ECONOMIC COMMISSION FOR ASIA AND THE FAR EAST

TECHNICAL ASSISTANCE ACTIVITIES UNDER THE EXPANDED PROGRAMME IN THE COUNTRIES IN THE ECAFE REGION *

Note by the Executive Secretary

The Executive Secretary herewith transmits to the Commission as background information the paper on the above subject specially prepared by the Secretariat of the Technical Assistance Board for this purpose.

* This document has been reproduced in New York from the original issued at Bangkok.

TECHNICAL ASSISTANCE ACTIVITIES UNDER THE EXPANDED PROGRAMME IN THE COUNTRIES IN THE ECAFE REGION

Information Paper prepared by
the Secretariat of the Technical Assistance Board

INTRODUCTION

1. Under Resolution 222(IX) of the Economic and Social Council the following international organizations participate in the Expanded Programme of Technical Assistance for Economic Development of Under-developed Countries, and derive the funds necessary to finance their programme activities from the Special Account made up of voluntary contributions from governments: the United Nations (UNTAA), the International Labour Organization (ILO), the Food and Agriculture Organization of the United Nations (FAO), the United Nations Educational, Scientific and Cultural Organization (UNESCO), the International Civil Aviation Organization (ICAO) and the World Health Organization (WHO)[1/]. These Organizations provide technical assistance to countries requesting such assistance in the fields falling within their respective competences. In fields such as comprehensive economic surveys, overall economic planning, community development, the promotion of cooperative organizations, and fundamental education where an integrated approach is essential and more than one Participating Organization is in a position to help, they often provide this assistance jointly.

2. The Technical Assistance Board, which consists of the executive heads of the Participating Organizations or their representatives, presided over by a full-time Executive Chairman appointed by the Secretary-General of the United Nations after consultation with the Participating Organizations, reviews and approves the programmes of the different Participating Organizations and coordinates their activities with a view to ensuring the development of properly integrated country programmes and seeks to ensure that the programme as a whole is well-balanced and

/develops

1/ In addition Resolutions of the ECOSOC and of the General Assembly have also approved the participation in the Expanded Programme during 1952 of the International Telecommunications Union and the World Meteorological Organization. Both Organizations have given technical advice in certain projects in collaboration with UNTAA, and have assisted UNTAA to select and brief experts and to award fellowships in their particular fields.

develops on sound lines. It also makes arrangements for liaison and the regular exchange of information with other Agencies engaged in providing technical assistance to under-developed countries, such as the bilateral programmes of the United States Government, the Council for Technical Cooperation in South and South-East Asia (the Colombo Plan Organization), the Organization of American States, and private agencies such as the Rockefeller and the Ford Foundations. It seeks thus to ensure that projects of technical assistance under the Expanded Programme take into consideration from the planning stage onwards the assistance which is being rendered to the country concerned by other programmes of technical assistance. Although the International Bank for Reconstruction and Development and the International Monetary Fund do not directly participate in the Expanded Programme of Technical Assistance and are not titular members of the Board, they are represented at its meetings and cooperate fully with the promotion of the objectives of the programme.

3. One of the basic principles of the programme laid down by the Economic and Social Council is that the Participating Organizations may provide technical assistance to under-developed countries only in agreement with the governments concerned, and on the basis of requests received from them. Resident Technical Assistance Representatives of the Board have been appointed in a number of countries to assist the governments, the Board and the Participating Organizations in the coordination of technical assistance activities in the respective countries. The Resident Technical Assistance Representatives also maintain effective and day-to-day liaison in the field with bilateral, regional, and private organizations rendering technical assistance. Among the countries of Asia and the Far East such Resident Technical Assistance Representatives have been appointed up to the present time in Burma, Ceylon, India, Indonesia, Pakistan and the Philippines. The Resident Technical Assistance Representative in Ceylon serves also as the Liaison Officer of the Board with the Colombo Plan Organization and attends the policy meetings of the Council for Technical Cooperation in South and South-East Asia. The work of these Resident Technical Assistance Representatives and of the Board is greatly facilitated and the effectiveness of the technical assistance provided greatly enhanced where the governments themselves have set up, as in India, Indonesia, Pakistan, the Philippines and Thailand, internal coordinating machinery to ensure that all requests

/for technical

for technical assistance from the country which are made to international, bilateral, regional and other programmes are channelled through some central point where they are analyzed and approved.

4. The technical assistance provided under the Expanded Programme take the form mainly of

(a) the services of experts provided either individually or as a team, according to the needs of each case, to advise governments in various fields of economic and social development;

(b) the grant of fellowships to nationals of the countries requesting such assistance to study new or advanced techniques abroad in their special fields of work;

(c) the conducting of regional training centres and seminars on specific subjects of regional interest initiated generally on the recommendations of the regional commissions or bodies of the Participating Organizations, and

(d) the provision of supplies and equipment, not locally produced, in limited amounts primarily in connection with training and demonstration projects.

In these regional training centres and seminars responsible officials in a group of countries having similar problems receive advanced training in the specific fields in which they work, such as the economic appraisal of development projects, the compilation of vital health, agricultural and labour statistics, labour inspection, or the development of fisheries. In other regional projects, such as the tour of the expert working group on Inland Water Transport, organized in 1951, and the study trip on Railway Operations, currently taking place, both organized jointly by UNTAA and ECAFE, experts in a region in a particular field are organized into working groups which visit countries with a high degree of economic development to study the technological advances in their field and determine which are applicable in their own region. Still other regional projects, such as the FAO's research project in rice breeding at the Central Rice Research Institute in Cuttack, India, reinforce through international assistance the

/basic research

basic research facilities in a country with a view to making the results of this research and the training facilities available to all the countries in the region.

5. As of 1 October 1952 some 348 experts provided by the Participating Organizations under the Expanded Programme were working in countries in the EC.FE region, assisting governments in a variety of fields ranging from comprehensive economic planning and integrated agricultural development to the techniques of child guidance. About 216 fellows drawn from these countries were studying abroad improved techniques in their respective fields[1/].

6. In the following tabular summary which has been prepared specially for the information of the Economic Commission for Asia and the Far East, under each country, and also in the part dealing with the regional projects, joint projects in which more than one Participating Organization has been or is concerned are summarized first, and then the projects of the UNTAA, ILO, FAO, UNESCO, ICAO and WHO in that order. The various projects which had been completed up to 1 October 1952, those which were in progress and those which were under consideration on that date are shown separately for each Organization in each country. The same arrangement has been followed in the section on regional projects. The extent to which the various projects shown either as being "under consideration by Organization" or as remaining "to be implemented", will actually be implemented depends on the availability of funds during 1953 and on the approval of these projects by the Technical Assistance Board.

7. The Technical Assistance activities of the UNTAA in the countries in the EC.FE region are described more fully in the separate report which that Organization has prepared for the Commission (Document E/CN.11/348).

8. In planning and administering an international programme of the magnitude of the Expanded Programme under which a total of 1598 expert from over 60 countries had been recruited from 1 July 1950 up to 1 October 1952 to assist more than 55 countries and territories, the Technical Assistance Board has had to pay constant attention to a number of complex problems such as the collection and the administration

/of the funds,

1/ This figure includes in the case of the UNTAA, fellowships awarded under the Regular Programme also.

of the funds, the recruiting and the briefing of the experts, the determination of their terms of service, the policies to be followed in respect of fellowships and regional training projects and the provision of equipment. Fullar information on these and other aspects of the Expanded Programme of Technical Assistance, including a country-by-country review of the assistance provided up to the end of 1951 to the various countries which requested wuch assistance,may be found in the Fourth Report submitted by the Technical Assistance Board to the Technical Assistance Committee which as a subsidiary organ of the Economic and Social Council reviews and supervises the activities under the Expanded Programme[1/].

BURMA (cont'd)				
UNTAA (")				
9. Community Development - An exploratory survey by an expert of Burma's needs in this field	Under consider-ation by Organiza-tion.			
10. Town Planning - An expert to advise Government on the setting up of a town planning department, to advise the National Housing and Town and Country Develop-ment Board, and to supervise execution of policy regarding town planning.	Under conside-ration by Orga-nization			
11. An expert in manufacture of buil-dings materials, such as tiles, drainage pipes, asbestos sheets, nails, etc.	Under consider-ation by Organi-zation.			
12. Medical Social Welfare - A medical social welfare worker to work with the WHO team on Maternal and Child Health and Control of Vene-real Diseases.	Approved by Orga-nization. To be implemen-ted.			
ILO				
1. Formulation of Social Security Scheme: 2 specialists from ILO - a specialist in general problems of social security, and an actuary working in this field, have prepared a scheme for progressive extension of social security in Burma which is now in hands of Government. Scheme provides for beginning to be made for non-agricultural workers employed in organized industry in respect of risks of sickness, maternity and employment injury.	Comple-ted.	2 experts released.		Further informa-tion may be found in Fourth Report of TAB to TAC (E/2213, Vol.II)

COUNTRY AND PROJECT SUMMARY	STATUS	EXPERTS	FELLOW-SHIPS	OTHER INFORMATION, INCLUDING DOCUMENT REFERENCES
BURMA (cont'd)				
ILO (")				
2. Development of Cooperatives - At the Government's request, the Organization has agreed to provide (a) an expert to advise on formation, development and organization of industrial cooperatives in small industries; (b) an expert to advise on organizational techniques in respect of cooperatives of all types and (c) an expert to advise on cooperative education, training and propaganda.	In operation	2 experts in field.		For further details reference may be made to ILO Document AAC/IV/D.2, submitted to Fourth Session of Asian Advisory Committee of Governing Body of ILO.
3. Industrial relations - The Governmental authorities are being advised by an ILO expert on various aspects of employer-worker relations and in revision of industrial relations legislation governing them. Outline proposals have been submitted by expert concerning constitution of works committees and industrial councils.	In operation	1 expert in field	1 fellowship completed. 5 other fellowships to be awarded.	As above.
4. Survey of working of employment exchanges - On the basis of his enquiry the expert will advise Government on future policy regarding employment service organization. To put work of this expert on a more solid basis Government has asked ILO to provide more experts - one to conduct survey of manpower and the other to advise on collection of employment statistics.	In operation	1 expert in field.	3 fellows undergoing training	As above. The work of these experts is to be coordinated with census operations to be started in Burma in near future.
5. Vocational training - The Government has requested services of one training-within-industry expert and an expert and fellowships in maintenance and repair of diesel water transport equipment to organize training schemes for the inland water transport Board.	Agreements signed on 30 June and 1 July 1952			ILO document AAC/IV/D.2

ILO (Cont'd) BURMA (Cont'd)				
6. The Government has also requested assistance in field of labour administration. The experts required would study existing machinery and recommend possible reorganization to meet needs of country as well as scarcity of qualified engineers to become labour inspectors.	Under consideration by Organization.	2 experts to be recruited.		
Food and Agriculture Organization (FAO)				
1. Biologics manufacture - An FAO veterinary mission consisting of 2 biologics manufacturing specialists - a veterinarian and a poultry expert - has been assisting the Government in cooperation with the USA bilateral programme. A laboratory at Insein is now properly established and fully equipped for vaccine production and diagnostic work. The laboratory is producing rinderpest, haemorrhagic septicaemia and rhaniket vaccines. Training of local technicians has been carried out. On advice of the FAO team. Government plans to set up an experimental breeding station for preservation, improvement and distribution of the Burmese type cattle.	In operation	2 experts in field.	10 fellowships approved	FAO document CL 16/6 of 16 Sept. 1952 submitted to Council of FAO, 16th Session, 17 Nov.1952. US Point IV has provided equipment to the value of $80,000 for laboratory. Adequate financing for experimental breeding station has also been promised by the US bilateral programme.
2. Development of Forest Resources - Following an FAO forestry survey and subsequent report of the FAO expert on integration in forest industries, the Government is projecting implementation of the recommendations. In connection with this project 60 tons of hardwood and bamboos from Burma have been shipped to Europe for testing and processing into lumber, and other building materials. Government has further requested assistance in setting up a pilot demonstration plant for demonstration and training in methods of seasoning and impregnation of semi-durable and non-durable woods.	Initial survey completed. Request for pilot plant in negotiation	1 expert completed assignment	2 fellowships approved 1 fellowship being negotiated	FAO document CL 16/6 of 16 Sept.1952.

COUNTRY AND PROJECT SUMMARY	STATUS	EXPERTS	FELLOW-SHIPS	OTHER INFORMATION, INCLUDING DOCUMENT REFERENCES
FAO (continued) BURMA (continued)				
3. Mulberry Cultivation - Following a decision of the Government to promote the production of raw silk in Burma, an FAO sericulture expert has been supplied.	In operation	1 expert in field		FAO document CL 16/6 of 16 Sept. 1952 submitted to Council of FAO, 16th Session, 17 Nov. 1952.
4. Agricultural Statistics - The Government has requested two fellowships and an agricultural statistician. The latter will advise on development and coordination of agricultural statistics & setting up of an effective statistical organization for Ministry of Agriculture in cooperation with Central Statistical Office of the Government.	Agreement signed on 12 Sept. 1952. To be implemented.			As above.
UNESCO				
1. Teacher Training - Assistance is being given in carrying out a broad educational programme including teacher training. An urban teacher training expert has been provided & a rural teacher training expert is being recruited.	In operation	1 expert in field 1 being recruited.	3 fellowships awarded.	
International Civil Aviation Organization (ICAO)				
1. Firefighting at airports - During the latter part of 1951, ICAO granted fellowships to two Burmese to allow them to obtain additional knowledge through attendance at a fire services course in the U.K. Both completed the course successfully & have been assigned to posts as airport managers in their country.	Completed.		2 Fellows completed training.	
2. Civil Aviation Legislation - The Government has advised ICAO that it would appreciate receiving an expert in drafting civil aviation legislation.	Under consideration by Organization.			

.../

COUNTRY AND PROJECT SUMMARY	STATUS	EXPERTS	FELLOW-SHIPS	OTHER INFORMATION, INCLUDING DOCUMENT REFERENCES
WHO BURMA (continued)				
1. Coordination of health programmes & their integration into the national health services. During 1951 the Organization provided a public health advisor to assist the Government in this field.	Completed	Expert released.		
2. Maternal & Child Health Project A maternal & child health project started in Rangoon, in 1951, has been continued through 1952. The services of two paediatricians and 7 nursing instructors have been provided & 3 fellowships have been awarded. A nurses' training programme is in operation at the Rangoon General Hospital as a part of this project. National matching teams are being trained & taking over increasingly the duties of the international staff. Courses have been organized for midwives & health visitors & public health nursing for trained nurses.	In operation.	9 experts in field.	3 fellowships awarded.	Supplies for the MCH Health Centres and maternity wards were supplied by UNICEF
3. Venereal Disease Control - Linked with the MCH programme is a WHO assisted project for the control of venereal diseases among women & children. A VD clinic was set up at Rangoon General Hospital & integrated with small outlying clinics. Personnel being trained include physicians, nurses & health visitors, as well as clinical & laboratory staff.	In operation	2 experts in field.	2 fellowships awarded.	UNICEF has furnished supplies and equipment
4. Demonstration team in Malaria Control - This team began working in Burma in 1951. Systematic courses by senior staff members for professional and sub-professional personnel have been given with practical demonstrative and lab. training. A population of approximately 55,000 has so far been protected and plans are being developed to extend project to cover 110,000 persons. The team has	In operation	8 experts in field.	5 fellowships awarded.	Equipment & supplies for this project were provided by Government from bilateral sources.

COUNTRY AND PROJECT SUMMARY	STATUS	EXPERTS	FELLOW-SHIPS	OTHER INFORMATION, INCLUDING DOCUMENT REFERENCES
WHO (cont'd) BURMA (cont'd) 4. (cont'd) also been assisting the Government in drawing up a 5-year national control programme in consultation with bilateral technical assistance agencies. A second WHO-assisted project for malaria control in the Chindwin valley has been held in abeyance because of the unsettled conditions in that area.				
5. TB Demonstration and Training Centre - This was set up in Rangoon in 1951. Tuberculin and mass radiography services of different age groups in Rangoon and Mandalay gave an overall morbidity of 2.25 per cent which is extremely high. It is intended to set-up a similar establishment in Mandalay, but this will not be fully in operation before June, 1953. With WHO and UNICEF assistance, the Government is carrying on a mass BCG Campaign. WHO has also been requested to provide a lecturer in TB at Rangoon Medical College.	In operation	2 experts in field.		UNICEF provided supplies and equipment for the TB Demonstration and Training Centre at Rangoon.
CAMBODIA (see next page)

CAMBODIA (continued)				
WHO				
1. Malaria and Insect Control- the WHO team of 2 experts has operated in parts of 3 Provinces and helped in training local personnel.	In operation	2 experts in field.		
2. Maternal & Child Health Demonstration & Training Project - The MCH specialist is assisting the Government in surveying MCH facilities & in immediate & long-term planning. He is also lecturing on paediatrics & obstetrics, School for Public Health Officers at Phnom Penh.	In operation	1 expert in field.		Closely coordinated with this is a nursing education project being implemented under WHO's regular programme.
3. School for Public Health Officers at Phnom Penh - The Government has requested lecturers, fellowships & supplies for this School.	Under consideration by Organization			
CEYLON				
TAB				
1. Resident Technical Assistance Representative - Assists and advises Government of Ceylon in formulating & coordinating its requests for technical assistance & also advises Board & Participating Organizations on their programmes of t.a. in Ceylon.	In operation	RTAR in field.		The RTAR in Ceylon serves also as the Liaison Officer of TAB with the Council for Technical Cooperation in Colombo.
UNTAA				
1. Hospital administration - Two experts provided by the Organization advised Government in this field for a period of 5 months during 1952.	Completed.	2 experts released.		Further details are given in Fourth Report of TAB to the Technical Assistance Committee of ECOSOC (E/2213) (Volume II)

COUNTRY AND PROJECT SUMMARY	STATUS	EXPERTS	FELLOW-SHIPS	OTHER INFORMATION INCLUDING DATES
CEYLON (continued)				
UNTAA				
2. Welfare of the Deaf & Blind - An expert provided by UNTAA conducted a survey for the Government on this subject & on vocational guidance of the adult deaf & blind.	Completed	1 expert released.		Regular Programme of UN.
3. Industrial Management Adviser - An expert provided by Organization is assisting in organizing the commercial division of the Department of Industries & supervising generally the commercial management of a number of existing & projected State factories.	In operation	1 expert in field.		
4. Development of salt industry in the Jaffna Lagoon - The Organization is assisting in this by providing (a) a salt technologist to advise the Department of Industries who also acts as coordinating officer for the whole project; (b) a salt evaporation expert and (c) a dams expert to draw up plans for flood protection, construction of dams & advise on seepage problems.	In operation	3 experts in field.		
5. Processing of beach sands for recovering ilmenite and other minerals - An expert has been advising the Ceylon Government in this project since July 1951. Most of the preliminary work has been completed & the installations of plant & equipment is about to start.	In operation	1 expert in field.		
6. Food Processing - Sugar Industry A UNTAA expert is serving since June 1952 as Resident Coordinating Officer & supervising the construction and operation of a Government sponsored sugar factory.	In operation	1 expert in field.

CEYLON (continued)				
FAO 1. (continued) 1. The former recommended the installation of equipment for cableways for high mount in logging & this recommendation is under consideration by the Government. The latter recommended the purchase of a portable sawmill for demonstration purposes. A travelling workshop is to be provided for maintenance of this and other equipment required for a forestry programme. One fellowship has been awarded.				
2. Reclamation & Resettlement in the Dry Zone – To increase the production of food in the Dry Zone the Government is making every effort to develop irrigation from major & minor schemes, from seepage wells, by restoration of abandoned tanks. An FAO agricultural advisor has assisted Department of Agriculture in the large reclamation & resettlement scheme in the northern dry zone. An FAO soils expert has completed his assignment, making a reconnaissance of the soils in the dry zones & paddy areas.	In operation	1 expert completed assignment. 1 expert in field.		FAO doc. CL.16/6 of 16 Sept.1952 submitted to the Council of FAO, 16th Session, 17 Nov.1952
A crop production specialist is advising on the plan of work for demonstrating correct cultural practices for crops which it is intended to raise in the settlement areas, as colonists for the new settlements are not familiar with cultivation techniques appropriate to the dry zone.	in operation	1 expert in field.		As above.
3. Cultivation of Sugar Cane – An FAO sugar-cane specialist has continued his experimental work & field investigations on production of sugar cane in the areas suitable to this crop, including cultural practices, use of fertilizers, crop rotation. He is also advising on the possibilities of growing sugar cane in the Gal Oya Valley.	In operation	1 expert in field.		As above.

ICAO (Cont'd)				
local personnel to operate air services. The ICAO is assisting the government in both these fields. The ICAO team in Indonesia during October 1952 numbered 19 experts. The organization has also agreed to provide some fellowships. Among other things the organization is assisting in the establishment and operation of a civil aviation school.				
WHO				
1. Malaria Control Demonstration Project, Fjilatjap: The project started in 1951 in a typically fertile rice area where malaria is checking development. WHO has provided a malariologist, an entomologist and a sanitary engineer. Spraying operations began in April this year and were expected to protect about 65,000 people. The objective is to assist the Governments in the control of malaria and in the training of local personnel in such control	In operation	3 experts in field		Some of the supplies and equipment needed for this project are being secured by the government from bilateral programmes.
2. Maternal and Child Care Project, Jogjakarta: WHO assistance in this field began early in 1952 when a social pediatrician and a nursing instructor arrived in Jogjakarta. The team is concentrating its efforts on Jogjakarta and the reorganization of MCH centres in that locality. Refresher courses for nearly 100 midwives were conducted during 1952. The Government has requested continuation of this project and 12 fellowships.	In operation	2 experts in field		UNICEF has contributed to this project by equipping maternal and child health centres and hospitals and by sending supplies and drugs and dried milk.
3. Treponematoses Control: The Government with assistance from WHO, under its regular programme, and UNICEF initiated in 1950 a large treponematoses control programme which was continued through 1951. A biostatistician was provided by WHO to assess the data so far obtained and three WHO consultants reviewed the work and gave guidance on the extension of the programme	In operation	1 expert in field

ICAO				
1. At the request of the Government ICAO granted in 1951 a fellowship in the field of airport management, operation and maintenance. This fellow has completed his study and by the end of September '52 two more fellowships had been awarded.			1 F completed. 2 Fs awarded	
2. The Organization has at present under consideration a request from the Government for three experts in the fields of air traffic services, airlines statistics and traffic analysis.				
WHO				
1. Pilot Project in Malaria Control - At the request of the Government WHO has provided two experts, a malariologist and an entomologist, for a malaria pilot project. The pilot project is intended to determine whether residual spraying of premises with insecticides is the most effective method of controlling malaria in the country, and also to train local personnel in this work.	In operation	2 experts in the field

PHILIPPINES (continued)				
WHO				
2. Bilharziasis Control - Bilharziasis is a major health problem not only in the Philippines, but in many neighbouring countries in the region. At the request of the Government three short-term consultants provided by WHO have made a survey and submitted recommendations on a proposed bilharziasis control programme. The team visited the most important endemic areas in the Philippines and recommended that experimental work would have to be undertaken before specific control measures could be devised and initiated. The second phase of this project will therefore be a pilot bilharziasis control campaign planned to begin early in 1953 with 3 WHO experts.	Preliminary survey completed. Second phase to be initiated.	3 consultants released.		
3. Tuberculosis Control - Under its Regular Programme, with the assistance of UNICEF, WHO has helped in carrying out a five-year programme for the control of TB & in establishing the BCG production laboratory at Alabat. The Government has now requested under the Expanded Programme the services of a BCG consultant.	Under consideration by Organization.			
4. Institute of Hygiene of the University of the Philippines - The Government needs assistance to strengthen the teaching staff of the Institute & WHO proposes to collaborate with the Johns Hopkins University & the Rockefeller Foundation in meeting this need. It would provide transportation for the lecturers & other entitlements as well as 4 fellowships & a small amount of essential teaching equipment & supplies.	Under consideration by Organization.			
5. Fellowships - The following fellowships awards have been made under the Expanded Programme: in 1951 a fellowship in the field of industrial hygiene; in 1952 three			13 Fs awarded.

WHO 5. (continued) fellowships in medical social service, nursing and veterinary public health; 9 fellowships to attend various regional seminars & training courses.				
SARAWAK				
WHO 1. Malaria Control Pilot Project - At the request of the Government the WHO malaria advisor visited the country & WHO subsequently negotiated a two-year pilot project with the Sarawak health authorities which is designed to train local personnel as well as to determine an effective and economical method for controlling malaria in the territory. WHO agreed to provide an entomologist & equipment, supplies & technical literature for this project. Negotiations are proceeding with a view to WHO's providing a second expert in 1953.	In operation.	1 expert in field.		
2. Health Education - A health education specialist has been appointed by WHO to assist both the education & health departments of the Government. The expert will help to prepare the syllabuses for various educational institutions and will advise on the development of techniques suitable for health education teaching in the area. Two fellowships were awarded in public health for study in the United Kingdom. One award was made to a nursing instructor to permit attendance at the regional nursing "workshop" in Taiwan.	To be implemented.	1 expert appointed.	3 Fs awarded

1. Survey of Labour Conditions - The Government requested this survey with a view to securing the necessary basic information for the formulation & implementation of appropriate labour & manpower policies. An ILO expert has conducted extensive field investigations and the data collected by him are being included in a preliminary report which is under preparation. Another expert is to be sent shortly to continue the work of the first expert and to frame recommendations to the Government about the legislative & other steps to be taken to improve working conditions.	First phase completed	1 expert released		
2. Vocational Training & Fundamental Education - The ILO is collaborating with UNESCO in the vocational training & fundamental education aspects of the pilot programme of educational improvement in the Cha-Choeng-Sao area, near Bangkok. A vocational training expert has been at Cha-Choeng-Sao for nearly a year & has been running a "progressive school" which he himself planned & at which instruction is based on selected crafts & trades of immediate utility to the local inhabitants. Another expert has surveyed the existing cottage industries & handicrafts in the area & has suggested possible lines of development. An expert in rural arts & crafts will be needed at a later stage to help in the teaching & organization of handicrafts.	In operation	1 expert in field. 1 expert completed assignment		
3. Development of Cooperatives - To assist the Government in this field an expert in general cooperative methods & another in consumers cooperatives have been requested from the Organization.	Under consideration by Organization.

UNESCO				
1. Cha-Choeng-Sao Educational Pilot Project & Teacher Training - During 1950 the Government requested assistance in a large teacher training programme as part of a ten-year plan of educational development, & requested 14 specialists together with equipment & scholarships. Under this request the Cha-Choeng-Sao Educationsl Pilot Projetc & the teacher training programme were undertaken by UNESCO as an integrated educational programme coordinated by a Head of the mission provided by UNESCO. UNESCO has provided the following experts for the projects (in addition to the Head of the Mission): one expert in adult education, 1 expert in audio-visual aids, 1 expert in teacher training, 1 expert in primary education, 1 expert in english teaching, & 1 expert in science teaching. Seven fellowships & equipment & supplies up to the amount of US$ 25,000 were allocated for these projects in 1952. ILO, FAO & WHO are cooperating in the pilot project at Cha-Choeng-Sao by providing specialists in vocational training, cottage industries & agricultural education and a school physician & a school nurse.	In operation	7 experts in the field	7 Fs awarded	Fourth Report of TAB to TAC, E/2213, (Volume II)
ICAO				
1. Development of Civil Aviation - In July 1951 ICAO sent a civil aviation adviser to advise the Thai authorities in formulating their civil aviation plans & policies, in particular on the coordination of air navigation services, the administration of civil aviation & the improvement of the network of aerodromes. Two fellowships were also awarded for advanced flying training.	In operation	1 expert in field	2 Fs awarded.

2. On the recommendation of the above expert the Government has requested six additional experts: a check pilot, an instrument overhaul & repair expert, an air traffic control instructor, a radio repair & overhaul expert, an aircraft & engine maintenance instructor & a communications instructor. Four of these experts are already in the field. Two fellowships in aeronautical meteorology were granted in September 1952.	In operation	4 experts in field. 2 appointed.	2 Fs awarded	
WHO				
1. Maternal & Child Health Projects - (a) Bangkok: At the Government's request plans were made by WHO during 1951 to help the Government with a MCH nursing programme in Bangkok, in which UNICEF would cooperate by providing supplies & equipment. By the end of 1951 a paediatrician had started work and early in 1952 a nursing advisor and a public health nursing instructor were in the field. The nursing consultant is attached to the Ministry of Health and is working with a national nursing advisor who will eventually take over this work. A medical social worker whose services are provided by UNTAA is a member of the team. The nursing instructor is also advising on the school health aspects of the teachers training programme being conducted by UNESCO. Three fellowships in 1951 and five in 1952 were awarded for this project.	In operation	4 experts in field	8 Fs awarded	
(b) Chieng-Mai: A further training & demonstration centre in MCH has been set up in the rural area in Chieng-Mai province with expert assistance from WHO & with supplies & equipment provided by UNICEF. A paediatrician & public health nursing instructor began work in this project in 1951.	In operation	2 experts in field

REGIONAL PROJECTS

PROJECT SUMMARY	STATUS	EXPERTS	FELLOWSHIPS	OTHER INFORMATION INCLUDING DOCUMENT REFERENCES
UNTAA, ECAFE and FAO				
1. Second Regional Conference of Statisticians in the ECAFE Area (Bangkok) - This meeting was held in Bangkok in September 1952 under the joint sponsorship of the United Nations, FAO and the Secretariat of ECAFE. Statisticians from countries in the region discussed technical problems concerning statistics of agricultural & industrial production & of wholesale price.	Completed.			
2. Seminar on the Production and Use of Power Alcohol (India) - This seminar was planned for October 1952 in Lucknow, India, to be organized jointly by the Government of India, UNTAA, FAO & the ECAFE Secretariat. The UNTAA has agreed to provide for this seminar 3 experts in the production & use of power alcohol, an executive Secretary, & a professional officer to assist in conducting the Seminar.	To be initiated.			
3. Seminar on land administration & land tax administration - Plans are being drawn up for a seminar on this subject, to be attended by participants from countries of the region & to be held in the autumn of 1953. The project would be jointly organized by the UNTAA, the ECAFE Secretariat & possibly FAO.	Under consideration by Organization.			
UN TAA and ECAFE				
1. Railway operations study trip & training centre - A railway operations study trip, organized jointly by the UNTAA and the Secretariat of ECAFE, with the assistance of the ECE Secretariat, was in progress in October 1952. Responsible technical officials from countries of the ECAFE region are studying methods & equipment in Europe, the U.S. and Japan. The participants will make recommendations regarding the syllabus & equipment for a regional training centre on railway operations to be set up during 1953.	In operation.	4 experts in field.		Only one of these experts is being paid from the Expanded Programme Funds.
